Mobile Fire Safety Pumps

Our portable fire pump on a "sack truck" style trolley complete with hose reel is very popular. This gives the option of storing the pump and reel safely and out of the weather in the cooler months, which can then be wheeled into position ready for the fire season. As it is an "all-in-one" solution, it also saves installing a post to mount the hose reel.

Similarly, we offer a portable fire pump and hose reel on a "flat bed" trolley. It has a low centre of gravity giving it more stability and is better suited to unlevel or rough ground.

Aldgate Pumps also stock a large range of Fire Hose, Hose Reels, Lay-flat hose, Suction hose, Brass Sprinklers and Fire Nozzles.
