Fire pumps - diesel

The Villiers range of fire pumps is available in both petrol and diesel driven units.

The range includes both single and twin impeller models as well as a special single impeller model which produces both high pressure and high volume output. This model can be driven by either a 13 hp electric start Villiers petrol engine or a 10hp electric start Villiers diesel engine.

The fire pumps are great for use in the construction, agricultural, plant hire and fire protection industry and any other situation where there is a need to move water or other liquids quickly, safely and efficiently.

High volume, low pressure fire pumps are available in 2 inch - 3 inch and 4 inch and in both petrol and diesel driven units. Fire pumps are sold in roll frames as standard.

all Villiers engines have a 2 year warranty
