

## GA Series | Granular Carbon Cartridges

The FiltaFlo GA Series carbon cartridges are for reducing unwanted taste, odour, chlorine, leaving beautiful tasting clear water for all drinking water applications.

A post filter minimises suspended particles and sediment. Maximum absorption of impurities is achieved through granular media, making it most suitable for drinking water, food service, whole of house filtration and many other situations.

### Benefits

- › Highly effective taste, odour and chlorine reduction
- › 2 length options – 10, 20, inch
- › 2 Diameter options – Standard, Maxi Plus (or big blue).
