

PP Series | Pleated Polyester Washable Sediment Cartridges

Puretec Pleated sediment cartridges are used where larger surface area filtration is required, in high dirt holding capacity applications.

The PP Series are used for sediment, scale and rust removal and have the advantage of low pressure drops and less flow restriction than comparable cartridges.

Benefits

- › Pleated style for large surface area.
- › Ideal for pre-filtration in high sediment applications.
- › Flow rates up to 200 litres per minute.
- › Available in 1, 5, 20, 50 microns.
- › 2 length options - 10, 20 inch.
- › 2 diameter options - Standard, Maxi Plus (or Big Blue).
- › Temperature ratings up to 60°C
